# UITP DECLARATION ON CLIMATE LEADERSHIP

## UITP goal to double the market share of public transport by 2025

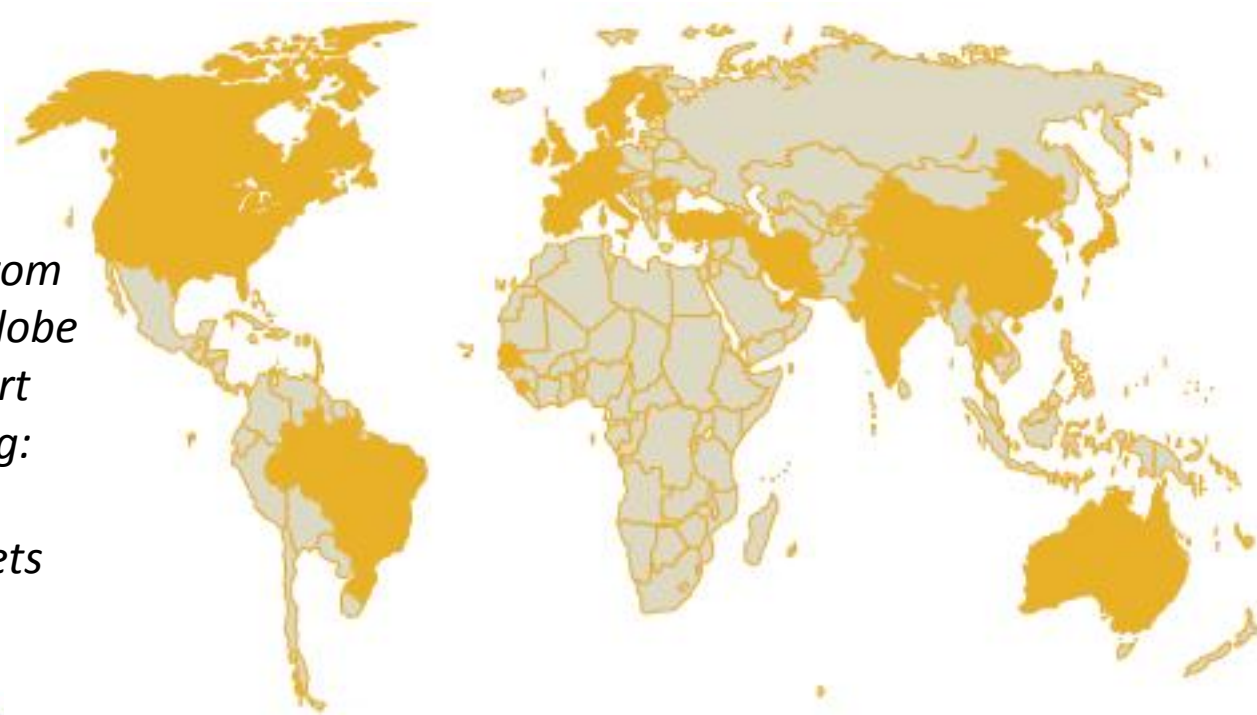

- ▶ Demonstrating **climate leadership** through actions that embrace **clean energy, boost efficiency** and **limit GHG emissions** in our cities
- ▶ **Support cities** to ensure efficient urban mobility by planning for **long term improvements in public transport**

# UITP MEMBERS COMMIT TO BE CLIMATE LEADERS

# NEW LPAA COMMITMENT

*Around 125 signatories from around the globe aim to support SDG reporting: what gets measured, gets managed.*

*All countries are committed to the SDGs which will ultimately help realise our goal to double the market share of public transport.*

**Target 11.2:** By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, **notably by expanding public transport**, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons.

11 SUSTAINABLE CITIES AND COMMUNITIES

# WHY THE COP MATTERS

- Around 150 national governments have now communicated their **CO<sub>2</sub> plans** for reducing emissions. They represent the **investment that each country feels able to make**.
- Many will address transport but while **some have remained vague** on how exactly they plan to achieve their stated reduction goals, **others have made specific announcement on public transport**
- Despite significant pledges, there is consensus that the **climate pledges to date will not be sufficient** to keep global warming below 2°C.
- National and EU **ambition will need to be scaled up** and, **countries will need to start implement their strategies or start to flesh them out**.
- **UITP members will be fundamental in delivering the commitments** which will help to scale up ambition.
